

Model: 638-CD

Extruded Aluminum Louver
Combination Drainable/Adjustable Blade

Standard Specifications:

Frame: 6063-T5 Alloy .081" thick extruded aluminum.
Blade: Drainable design .08" thick 6063-T5 extruded aluminum, mechanically fastened, set on 38 degree angles. Blades are 4.75" apart. (Bottom blade opening varies).
Birdscreen: 1/2" - 19ga. galvanized birdscreen standard

Minimum size: 11" height
Maximum Size: 72"w x 96"h Single Section

Options:

- Expanded Aluminum Birdscreen
- Removable Birdscreen
- Removable Insect Screen
- 1 1/2" Flange Frame
- Adjustable Sill Extension
- Kynar Finish
- Anodized Finish
- Powder Coating (Other Finishes Available)

Sill Type A:

Sill Type B:

59% Free Area

Note: All 638-CD louvers are built 1/4" under size both directions unless ordered actual size.

This table has been developed to assist in application and selection of these louvers. Two numbers are shown for each louver size. The upper number shows CFM of air flow permitted when selecting an intake louver at the point of zero water penetration. Pressure drop when using this Selection Guide for an intake louver will be .09 in. w.g. The lower number shows sq.ft. of louver free area for each louver size. Louvers may be selected at other operating points on the Performance Curves if desired using the formula. CFM = Free Area (sq. ft.) x Free Area Velocity (FPM)

Leader certifies that model 638-SD louver shown here is licensed to bear the AMCA seal. The ratings shown are based on tests and procedures performed in accordance with AMCA Publication 511 and comply with the requirements of the AMCA certified ratings program. The AMCA certified ratings seal applies to air performance rating and water penetration rating. The 638-CD is not certified.

Water Penetration Chart

Water Penetration Data applies to test unit size 48"x48" only. Beginning of Water Penetration is 922 FPM Free Area Velocity.

Air Performance Chart

The AMCA certified rating seal applies to air capacities in intake mode only. Performance shown is at standard air density 0.075 lbs/ft³.
